

CERTIFIED RECORD OF LAND CORNER MONUMENTATION

History of original corner establishment:

Set by Bamford Robb in 1880 under joint contract no. 366, dated August 18, 1880.

"Set granite stone 14x14x12 in a mound of stone."

Robb & Herman D. Gradon in their joint contract #383, dated March 26, 1881 report in their retracement of the standard line in 1881

"I find cor. in good condition and to agree with notes obtained at the Surveyor General's office viz: A granite stone 14x14x12 in stone mound."

Not found by Frank J. Van Winkle in 1917 "after diligent search".

Geo. W. Root in his survey of HES 252 in 1922 reports finding "a granite stone 14x14x12 ins. in a mound of stone, marked as described by the Surveyor General."

Duane I. Griffith in 1967 during his survey for the Malheur National Forest states "There is no evidence of the original corner. This point is not monumented."

Description of corner evidence found:

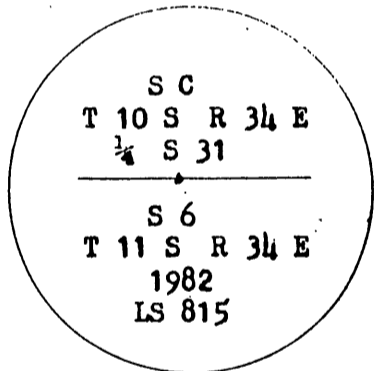

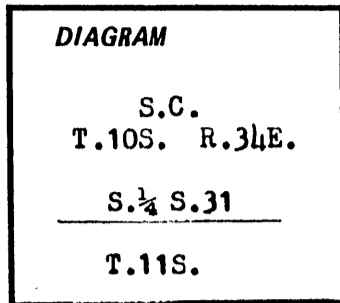

After a diligent search I found no evidence of the original monument or its accessories.

Description of monument and accessories I established to perpetuate the original location of this corner:

I reestablish the corner position on the Standard Parallel at proportionate measure to the distances along the parallel from the nearest corners as shown on the accepted plat of HES 252 as this appears to be the most recent record of the original location.

At the corner position I set a standard 3/4" diameter aluminum cap, with magnet attached to underside, mounted on a 2" diameter by 30" long aluminum pipe. I surrounded the monument with a mound of stone and stamped the cap as shown.

There being no trees or other convenient objects nearby I set two 5/8" x 30" iron rods as references in a wire fence row running SW to NE. One bears N.84° E., 12.68 feet and has an aluminum cap stamped RM 12.68' LS 815 and the other bears S.13° E., 12.16 feet with an aluminum cap stamped RM 12.16 LS815.
